PRESENTER BIOGRAPHIES

Patrick Low is Director of the Economic Research and Statistics Division of the World Trade Organization. He has worked for the WTO since its foundation in 1995. He was appointed Chief Economist in 1997 and served as Director-General Mike Moore's Chief of Staff from 1999-2000, after which he returned to his previous post. He worked in the World Bank's research complex (International Trade Division) from 1990-1994. Prior to that, he taught at El Colegio de México in Mexico City from 1987-1990 and worked as a consultant for a range of governments and intergovernmental institutions. From 1980-1987, he worked at the GATT secretariat in Geneva. Patrick Low is also an Adjunct Professor of International Economics at the Graduate Institute of International and Development Studies, Geneva. He teaches courses there on trade theory and the theory of trade policy, the economics of climate change, and the environment. He holds a PhD in Economics from Sussex University in the United Kingdom and has written widely on a range of trade policy issues.

Marc Bacchetta is a Counsellor in the Economic Research and Statistics Division of the WTO that he joined in 1996. Between 2002 and 2004 he worked at the World Bank Institute on leave from the WTO. He holds a PhD from the University of Geneva where he used to teach economics for six years. His research focuses on market access, adjustment to trade reforms and accession to the WTO.

Cosimo Beverelli has worked at the Economic Research and Statistics Division of the WTO since April 2009. He is also lecturer in the Economics Department of the University of Geneva. Before joining the WTO, he worked at the Graduate Institute, Geneva, and at UNCTAD. He holds a PhD in International Economics from the Graduate Institute, Geneva, where he wrote a thesis on “The Consequences of Offshore Outsourcing”. He has published two co-authored book articles, and two of his most recent research papers are published in the Journal of Industry, Competition and Trade and on International Economics and Economic Policy.
Olga Skorobogatova is a Market Analyst in the International Trade Centre, where she contributes to the trade-related technical assistance, in particular in the area of market access, including tariff and non-tariff measures. Olga develops and conducts training workshops on market analysis for trade development. Furthermore, she participates in the development of interactive web applications containing data and analysis of international trade and market access. Olga has previously worked in the United Nations Economic Commission for Europe and in the private sector. Olga completed an MSc in International Strategy and Economics from the University of St. Andrews, Scotland. She finished a Master degree in International Relations and is currently a PhD Candidate in International Economics at the Graduate Institute of International and Development Studies in Geneva. Olga’s research interests centre on international trade and development, with a focus on non-tariff measures, regulatory protectionism and other trade frictions.

Samuel Munyaneza is an Economic Affairs Officer in the Trade Analysis Branch of UNCTAD’s Division on International Trade in Goods and Services, and Commodities. Since joining UNCTAD in 1998, he has been part of the team producing UNCTAD's TRAINS information system and has been collaborating with the World Bank to manage and further develop the WITS software.

Roberta Piermartini is a Counsellor in the Economic Research and Statistics Division of the WTO. Her research focuses on trade theory and trade policy analysis. Since 2003 she is one of the authors of the World Trade Report, and she coordinated the World Trade Report 2009 on contingency measures. She has worked in a number of WTO dispute cases as WTO Secretariat support to the panels. Prior to joining the WTO in 2000, she was lecturer at the University of Southampton and research fellow in the research division of Confindustria. She holds a PhD in Economics from the University of Southampton.

Marco Fugazza is an Economic Affairs Officer in the Trade Analysis Branch of UNCTAD’s Division on International Trade in Goods and Services, and Commodities. He joined UNCTAD in December 2002. He earned a PhD at the European University Institute in Florence and then spent a year at CERAS (now part of the Paris-Jourdan School of Economics) on a fellowship financed by the European Commission. Later he worked with the French Ministry of Labour in quality of microeconomist dealing with the assessment of social policies using micro-simulation models. He also worked as a consultant for the World Bank and the International Labour Organization. He has published on issues related to international trade, labour markets and unemployment.
Alessandro Nicita is an Economic Affairs Officer in the Trade Analysis Branch of UNCTAD's Division on International Trade in Goods and Services, and Commodities. Before joining UNCTAD he worked in the Development Economics Research Group at the World Bank. His research focuses on issues related to international trade and development. His work has included the measurement of the effects of trade policies, the analysis of policies improving market access for developing countries, as well as the effect of trade policies on poverty and inequality. He has authored several publications in the field of international trade and economic development. He holds a PhD in Economics from the University of Geneva and a Master in Applied Economics from the University of Michigan.

Yvan Decreux is an economist specialized in trade policy analysis. After working for 10 years with the Centre d’Etudes Prospectives et d’Informations Internationales (CEPII) in Paris, including a one-year secondment at the World Bank in Washington in 2007, he joined the International Trade Centre in April 2010. Along these years he has participated in the construction of a computable general equilibrium model of the World Economy, the MIRAGE model, with which he simulated a number of trade agreements, bilateral agreements and multilateral negotiations of the Doha Development agenda. He also provided numerous teaching sessions of computable general equilibrium modeling, for various audiences at master level and above, or for professional economists. He contributed to the construction of national computable general models for an EU project in Morocco in 2003, and with the ITC in Tunisia in 2009-2010. He owns diplomas in Engineering and Economics from École Polytechnique and ENSAE in Paris, as well as a PhD in Economics from University of Paris 1.
